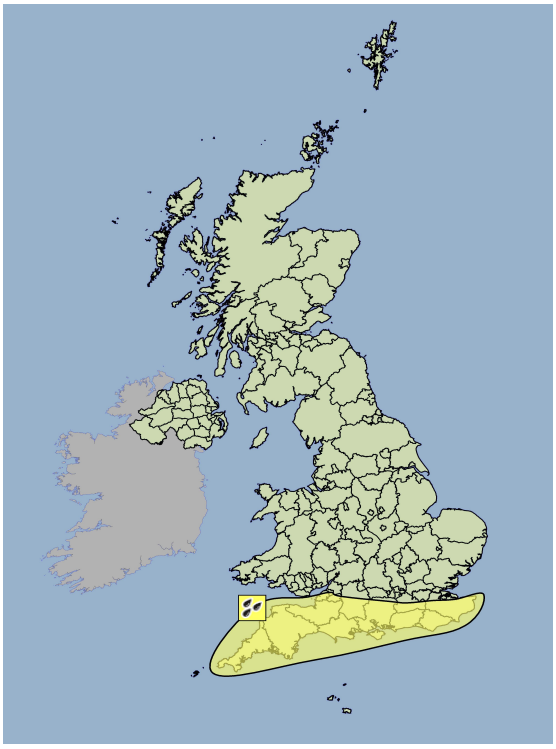
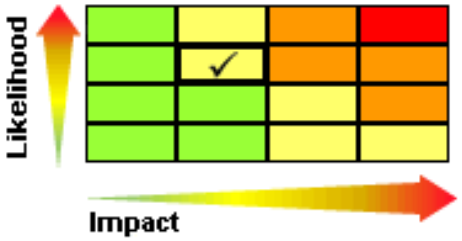
National Severe Weather Warning Service





Chief Forecasters Assessment
A developing area of low pressure is expected to run quickly eastwards across southern England overnight Sunday into early Monday bringing widespread rain across southern Britain which will be heavy in places. Rainfall accumulations will typically be between 10 and 20 mm and locally around 30 mm. It will also become windy in southern counties, but more particularly along exposed coasts where gales may develop for a time during Sunday evening and the early hours of Monday, giving gusts of 50 to 60 mph.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **18:00 on Sun, 03rd Nov 2013** until **11:00 on Mon, 04th Nov 2013**

Rain, heavy at times, is expected to reach southwest England later on Sunday before spreading eastwards to affect the rest of southern England overnight Sunday and into Monday morning. This additional rainfall, following recent wet weather, means that the public should be aware of the risk of localised flooding. Gales may also develop along some coasts.
